Initial Wheat Pool Payment Will Be 60 cents Basis No. 1 Northern at Fort William

Lowest Price Paid Since Organization Started In Business

The initial payment for the 1929 crop to members of the Canadian Wheat Pools has been set at 60 cents on the basis of No. 1 Northern grade at Fort William.

In a statement to the press A. J. McPhail, chairman of the board of the central selling agency of the pools, said in part, "The board of the Canadian Wheat Pools naturally desired to make the initial payment as high as possible in keeping with financial safety, in order that our members should receive as large an amount of cash as possible when they delivered their wheat to meet their present financial obligations, but in view of the serious difficulties which arose in connection with financing the 1929 crop and to avoid the recurrence of a similar situation arising this year, the initial payment of 60 cents per bushel on wheat has been decided upon."

"A further payment which would involve an increase in the initial payment will be made at as early a date as market and financial conditions will permit."

Leaseholders Plan To Core Drill in Oyen Oil Field

Leaseholders in the Oyen oil field are making plans to core drill in the field with a view of definitely locating the structure. Meetings recently held have shown that this procedure is more favorably considered than the formation of a company at this time to do actual drilling.

Unbounded faith is held as to the possibilities of the field, but it is generally felt that in view of existing financial conditions the raising of a sum necessary to complete a well would not meet with success.

Tennis Players Active

The tennis courts are much in use these days. Play is continued enthusiastically till dusk each evening. Tournament games, however have not been played off as rapidly as expected but the executive hope to see the various competitions concluded in the near future and a new series started.

Players are asked to consult the charts at the courts and arrange their games as soon as possible.

UNITED GRAIN GROWERS LTD.

A dividend of 6 per cent per annum has been declared upon the paid-up capital stock of United Grain Growers, Limited for the financial year ending July 31st, 1930. Cheques will be mailed on September 1st, 1930, to shareholders of record at the close of business July 31st. By order of the Board of Directors

R. B. LAW, President.

Winnipeg, Man.,
August 21st, 1930.

School Opens Sept. 2 For Fall Term

Oyen public and high schools will open for the fall term on Tuesday, September 2, with the following staff.

Mr. E. G. Evans, Didsbury, principal; Mr. G. P. Freebury, New Bridgen, grades 6-7-8; Miss Aileen Mac Todd, Chinook, grades 3-4-5 and Mrs. Alice C. Robinson, grades 1 and 2.

Ninth Fortnightly Crop Report

* Issued by the Department of Agriculture, Edmonton, August 26, 1930.

Wheat cutting is well advanced in the southern part of the Province, general in the central area and has commenced in the northern districts including Peace River.

In the south-eastern area the quality of grain is high but the yield is uniformly light. Further west crops on summer-fallow are giving returns of from thirty to thirty five bushels per acre. On all spring prepared land the yields will not be large. Irrigated areas report all crops slightly above average.

In the central eastern part of the Province all grains have suffered severely from wind and drought. Crops are short and in many instances ripening is uneven. Late rains have caused excellent growth on fields sown to oats and barley and there will be a fair supply of food. There have been several rather severe hail storms in this area which have caused heavy losses.

In the western and northern areas prospects are satisfactory in quality and yield. The recent dry period in the Peace River district has slightly reduced the yield of oats and barley. Wheat has not suffered.

Rains have been general over most of the Province in the past few days and pastures are much improved. Sugar beets and potatoes are making excellent progress.

School Opening

School will soon open boys and girls. It means new school supplies.

Do you know we sell

6 good Scribblers for 25 cents.

A big ten cent Scribbler, best quality cover.

Two good Pencils for a nickel.

A bigger bottle of ink for 10 cents.

Rulers and Erasers etc.

A black Peak Cap, the newest thing 35 cents.

We have new Knickers and wearing goods for the boys. Come down and get fitted. Girls we have lovely dress material for the new frocks and the prices are very low. Just bring mother down and make your selections early.

Two Clearing Lines

Men's odd trousers in fancy light colored Tweeds, new styles elastic or plain bands. Reg. to \$5.50. Clearing special at \$3.95.

Men's Fancy Tweed Caps, all sizes \$1.75.

Canadian Pacific Steamships Aid R-100

On her historic voyage across the Atlantic to Montreal, the magnificent dirigible, R-100, was in continual wireless touch with ships of the Canadian Pacific trans-Atlantic fleet. The great air liner was hardly out above the ocean when she was in communication with R.S. "Monticore," then approaching the British Isles and some distance farther she overtook the Montclair, S.S. "Empress of France" was her next neighbor as that ship was nearing Newfoundland, while down the St. Lawrence she spoke with the "Duchess of York," the "Empress of Scotland" and the "Duchess of Bedford." Eighteen other C.P.R. vessels were lying during her flight at British or Canadian ports. Thus the great Canadian transportation company was enabled to give a waiting world the latest particulars of her flight, since all these vessels are in wireless communication with the shore and their messages were broadcast through the press and featured in all R-100 news items.

Planning, Saving, Investing

"To have AND to hold," when applied to money, does not seem to be an easy lesson for most people. The fact is that during the recent stock market slump there have been millions who have failed to do the "holding." They have emerged as losers. They have allowed the lure of speculation to divert their time and attention from their regular occupations and interests to a field of activity about which they knew next to nothing. So it seems that most of us need to concentrate more on the "holding" part of our financial plan.

So writes Leroy D. Peavey, president of the well known Babson's Statistical Organization, who, from an income-producing point of view divides the average individual's life into roughly three parts. The first, from age twenty to age thirty, might be called the period of preparation or getting settled. The second, from thirty to the late fifties, is the period of accumulation. The third, from the late fifties on, is the age of retirement or at least of lessened earning power.

No matter how much time and money may be expended during the teens and twenties in preparing young people for their life work, they can never, says Mr. Peavey, be independent during the last period of life unless they have made good on those twenty-five or more golden years in the second period. It is during this period of accumulation that one's surplus must be built up and judiciously invested if one hopes to be independent the rest of his days. His watchwords should be Plan, Save and Invest.

Planning means the making and using of a budget. The budget is the floor-plan of your financial structure. Fit it to your own situation and then stick to it, instead of shelling it after a couple of trials. Of what good are blue prints if the structure does not grow up in accordance with the specifications? And one of these specifications will be the proportion—whatever it may be—of your income that is to be set aside as savings. Another specification will be the determination to have a home of your own some day—one that eventually will be free and clear. Because it is free of mortgages or other claims, it will stand between your family and distress. Life insurance and other sound investments should likewise be included.

The second watchword, "Saving," has been brought to the consciousness of the people of this generation by many years of educational effort. It has been adopted by hundreds of thousands of Canadians as evidenced by savings accounts in post offices and banks. It was given a great impetus during the war when, through the urge of patriotism and in response to the call to sacrifice to "win the war," thousands of people who never before had invested in a bond bought Victory Bonds, and thus learned the lesson of how easy it is for money to accumulate and multiply itself through the use of compound payments. But the lesson of saving is one that must be taught to each successive generation, and there should be no slackening in the effort. It is a lesson that all parents should see their children learn early in life and continually practice, until the savings habit is formed.

When it comes to "Investing," you have the choice between involving the most unbelievable power of compound interest when harnessed to regular monthly savings on one hand; or the other putting your money in well secured securities. In the first case you need no particular advice, for in its operation compound interest is both tireless and automatic. In the second instance, that is, in investment securities, you need advice of the most discriminating sort. This fortunately, you can easily obtain from your own bank.

You will want to have among your investments some good sound bonds anyway, and then if your available funds permit, some of the best stocks. The latter should be bought outright and never on a shooting margin. Remember this, too. It is wise to keep a part of your funds in liquid form, that is, in cash or in short term securities, as can quickly be converted into cash. They will be prepared for emergencies. You might need this money for a personal emergency, or for some special investment bargain in the market that had come to your attention.

The point is to put each spare dollar to work, twenty-four hours a day and each day in the year, earning more income for you. Your ability to "spare" these dollars for such a proposition will lead to a surprising increase in your "sparing" power; that is your ability to save. You will be able to see with your own eyes the rapid growth of financial independence that is going to stand you in such good stead later in life. But in order that your future income may be ready when you need it, start to build that income NOW.

The word "investment" should be broadly interpreted to include not only bank accounts and securities, but insurance policies, your own home, real estate, mortgages, and other forms of capital. Life insurance is indeed important. It not only helps people to save, but it is a protection as well as an investment. Every person should carry life insurance, but, on the other hand, it is not the part of wisdom to place all your earnings in life insurance. Follow instead the practice of diversifying your investments—part in a savings account, part in life insurance, and part in sound securities.

However, this advice about investing is almost valueless if it is to be only a temporary effort, or if you allow your investments to be frittered away through carelessness or the greed for more. Rather turn to the fundamental sources of assured income.

And, above all, turn to hard work, initiative and perseverance, as the right means of accumulating sufficient funds for your needs. It is the purely speculative stock market in the hope of getting something for nothing. Lastly, carry out the principle that "godliness with contentment is great gain," in your finances as well as in the rest of your life.

Wheat Pool Membership
The Canadian Wheat Pool now has a membership of 142,000, the number of members having been increased by more than 2,000 within the year, according to Gillis Percell, of the Canadian Press.

Have Minard's Liniment on your shelf.

Huge Power Projects

Millions To Be Spent in Next Three Years On Hydro Development

More than \$100,000,000 will be spent in each of the next three years on power projects now under development in Canada. Although there are other plans for important building projects, none will have a more immediate bearing upon the industrial development of Canada than those contemplated by the power industry.

The present turbine installation in the Dominion averages 583 horse-power per thousand of population, a figure which places Canada among the leading countries of the world in per capita utilization of water-power. The total installation of water-power amounts to over 5,700,000 horse-power and an additional installation of over 3,000,000 horse-power will probably be made within the next five years. Quebec has the largest installation with an average of nearly one horse-power per person. Ontario has a total installation of nearly two million horse-power, and in 1929, the power companies in that province generated over six billion kilowatt hours, or more than one-third of the total produced in the Dominion. Manitoba has an installation of over 300,000 horse-power, and Alberta, 70,000 horse-power. On the Pacific coast, large resources are available in hydro-electric plants with a capacity of 500,000 horse-power have been installed in British Columbia.

Good News For Students

World Curtail Homework and Examinations For Vancouver High Schools

Curtailment of home work and abolition of examinations for Vancouver high schools is being considered by educationists here, in a letter with a view to lightening school work for children and, at the same time, increase the efficiency of study.

With the inauguration of the new four year high school matriculation course at the commencement of the fall term, home work will be cut in half, it is declared by principals of several high schools. Resistance against home work which has been sweeping the country in the past few weeks is steadily increasing, both among parents and teachers who declare that the old fashioned idea of giving children enough work to keep them out of mischief is not raising the standard of education. With science investigating every branch of life for the purpose of simplifying living conditions, education, it is claimed, has stood almost still in spite of the efforts of psychology experts.

Recipes For This Week

(By Betty Barclay)

GINGER BREAD

2 cups sugar.
1 cup butter.
1 cup molasses.
4 eggs.
1½ cups flour.
1½ cups baking soda.
1 tablespoon ginger.
1 tablespoon cinnamon.
2 cups sour milk.
1 teaspoon salt.
Cream butter and sugar; add well beaten eggs and molasses. Sift dry ingredients together and add alternately with milk. Bake in cake pans about 35 minutes in slow oven or about 325 degrees Fahrenheit. Cut squares and serve with whipped cream.

ORANGE CAMEL

6 oranges.
½ cup sugar.
½ cup water.
½ cup cream.
Peel oranges, removing membrane with peel, and cut crosswise, in slices. Put sugar and water in a small saucepan, and boil quickly until syrup is a golden brown. Arrange layer of orange slices in glass dish; sprinkle with sugar; pour over enough of the syrup to form a thin coating over the orange; add another layer of orange and syrup; repeat until oranges is used. Beat cream until stiff, pile lightly on the orange, and sprinkle with chopped pistachio nuts.

Many infants are infested by worms which cause great suffering, and if not removed by means of easy constitutional weakness develops. Minard's Liniment Formers will clear the stomach and bowels of worms and will set up the system that there will be no recurrence of the trouble. And not only will they repair the injury done to the organs that worms cause and restore them to soundness.

Military Promotion

Western Officers Appointed To Command Of Regina and Calgary Regiments

Promotion of Major E. R. Knight to the rank of Lieutenant-Colonel, and to command the Calgary, Alberta, regiment, was announced recently at the Department of National Defence. It was also made known that Lt.-Col. J. McArra has been appointed to command of the Third Reserve Battalion of the Regina Rifles Regiment.

Both officers have had long service in the Canadian Militia. Lieutenant-Col. Knight proceeded to England with the 59th Battalion, C.E.F., in March, 1916. He served in France and Belgium. Lieutenant-Col. McArra went overseas with the 38th Battalion, in May of 1915. His service also was in France and Belgium.

Pioneer Mountie Dies

Peter O'Hare, 71, pioneer mounted policeman of the west, died recently at Maple Creek. Since the earliest days of the police in Saskatchewan Mr. O'Hare was associated with all activities, taking part in the Red Rebellion engagement. His service extended over 40 years.

Crude Oil Consumption

At present only about 2½ per cent. of our crude oil consumption is produced in Canada.

Trans-Atlantic telephone service has been extended in Sweden, so that it is possible to talk to people within the Arctic Circle.

Minard's Liniment removes Warts, relieves Bunions.

DOCTOR'S FRUIT SALT

Doctors Warn Against Drastic Purgatives

Physicians know the danger of using cheap cathartics that create a harsh, unnatural laxative. They know that ENO'S "Fruit Salt" is more than a laxative. It is a delicious health beverage that sweetens and tones up the entire system—and that its daily use—just a dash in a glass of water, every morning—is an aid to vigorous good health.

Report On Gas Fields No Cause For Alarm

Member Of Geological Survey Of Canada To Make Report On Saskatchewan

Dr. G. S. Hume, of the Geological Survey of Canada, will make an immediate survey from all available data, the prospects of finding gas in Saskatchewan, in suitable quantities within the province.

He will not make any actual investigation in the field at the present time, but having visited each city interested in gas development and gathered material from other sources will make a report based on geological information already obtained by various survey parties.

This report, framed as it affects the various cities interested, will be submitted to the Dominion Government, which in turn will forward it to the provincial government. The joint committee, representative of four cities of Saskatchewan interested in the gas question, will then be put in possession of all the facts obtained.

This was the outcome of a conference held at the parliament buildings, at Regina, when Dr. Hume met five members of the Saskatchewan Government and also of the four-city gas committee.

Soft corns and warts are ugly, painful and irritating. Remove them quickly and safely with Douglas Egyptian Liniment.

Encourage Sheep Industry

Economic Survey Of Sheep Ranches Of Western Provinces To Be Undertaken

An economic survey of sheep ranching in Saskatchewan, Alberta and British Columbia, is being undertaken by the Dominion Department of Agriculture, under the direction of the agricultural economics branch in co-operation with the Dominion Experimental Farms. This is the beginning of a programme of research work in agricultural economics on behalf of the livestock industry.

The Yungas Railway, of Bolivia, is erecting telegraph poles.

No Cause For Alarm

Says Russia Will Not Be Factor In Wheat Exportation For Some Time

Thomas D. Campbell, of Hardin, Mo., who has been called the world's largest wheat grower, returned recently from a trip to Russia as agricultural consultant to the Soviet, and announced that it would be longer than alarmists thought before Russia was a factor in any export field.

As the country's five-year program progresses, he said, the needs of the country also increase. The more she grows the more she consumes. It will be at least three years before the Soviet government is a factor in the export of grain or any other commodity. Very soon the internal needs of the country will call for 1,000,000,000 bushels of wheat annually, just as an example.

A Corroder Of Pulmonary Troubles.—Many testimonials have been presented showing the great efficacy of Borden's Electric Oil in correcting disorders of the respiratory process, but the best testimonial is experience and the Oil is recommended to all who suffer from these disorders with the certainty that they will find relief. It will stay inflammation in the bronchial tubes.

Honey has become so popular in the British Isles that whole hives were produced there in the last 12 months. Fully 3,500 tons valued at \$2,000,000, were imported.

The United States exported 25,707,454 sets of false teeth last year.

The Handy Bottle

Minard's is the more reliable in the Handy Bottle For strains, burns, bruises, boils and bites.

ARMY OF MEN OUT OF WORK EAST AND WEST

Ottawa, Ont.—In 84 centres which have replied to the query of Hon. G. T. Robertson, Minister of Labor, the unemployment figures there are 112,904 people out of work in Canada, and it is estimated this number will increase to 150,000 during the winter. Mr. Robertson gave these figures to the Employment Service Council, of Canada, at the opening of the annual meeting.

The figures, he pointed out, did not include 14 or 15 centres which had not reported, or the number who were out of work in numerous small centres throughout the country, and in rural areas.

Senator Robertson said he considered the figures received a conservative estimate. It was not unreasonable to say, he added, that there were now 200,000 people out of work in Canada. Figures compiled on August 15, he stated, showed that out of 206,597 union men in Canada, 26,796, or 12.9 per cent., were out of work.

The Government of Canada does not propose to adopt paternalism as a policy in dealing with unemployment but it does propose to help the people to help themselves, Senator Robertson declared.

"I do not for the moment suggest," he said, "that the present unemployment is due to the lack of skill or lack of governmental activity. Unemployment is not a purely Canadian problem. It is world wide. But it is not the business of the government of Canada to look after the world as a whole. It seems to me the problem first to be faced by the government to look after the people of Canada and assist them to look after themselves."

"A proposal has just been made to me that if the federal grant to technical education were restored it would be a great boon to the unemployed. I do not know what the government will do because the matter has not been considered. But I think it would at least enable the unemployed man to improve his skill during the time he is out of work."

"I feel, however, that if the technical education plan as inaugurated some years ago had been carried out to the full there could not be so much unemployment today."

The cause of unemployment the Minister referred to development of labor-saving machinery, particularly in the west. Then there was the question of immigration. Finding that it was its duty to see that the people of Canada had employment before inviting others to come, the government had taken steps to restrict immigration.

A special session of parliament was being called to deal with the situation. The government proposed to pass legislation enabling it to invite the co-operation of the provincial and municipal authorities and the co-operation of employers of labor with a view to providing all the employment possible as quickly as it could be done.

Daughter Born To Duchess

Birth Of Daughter To Elizabeth Of York At Glamis Castle

Glamis, Scotland.—The birth of a daughter to the Duchess of York was announced at Glamis Castle, the home of her parents.

The royal mother and the little princess are making highly satisfactory progress, according to an official bulletin from the gray old castle.

News of the birth was immediately flashed by telegraph to King George and Queen Mary, who are staying at their Norfolk estate of Sandringham.

The baby is the fourth grandchild of the King and Queen. The others are Princess Elizabeth, the daughter of the King, and the two sons of Princess Mary, Countess of Harewood.

John R. Clynes, home secretary of the Labor Government, officially attested the royal birth. "He and H. R. Boyd, ceremonial secretary to the home office, were both at the castle to attest the birth."

Nurse Beavers, who attended the Duchess and Princess Elizabeth, was with Her Highness. Dr. Dore Miles, who with Sir Henry Simons, noted London obstetrician, assisted at the birth, has attended the duchess since her childhood.

New Gold Discovery

Hudson, Ont.—A new gold discovery is reported from the district of miles west of Red Lake, and near the Manitoba boundary, and a mining expert has left for the locality to investigate.

Salvage Abandoned 'Planes

Two 'Planes Of McAlpine Party Are Recovered After Enduring Storms Of Last Winter

Edmonton, Alberta.—Beating the Arctic again, Canadian fliers and airplanes have triumphed in a far northern test.

The test constituted a drama in three acts. The first when the McAlpine party was forced to abandon two monoplanes, forced down by fuel shortage, on lonely Dease Lake, on the Arctic coast, late last autumn. The second act was while the machines remained through an Arctic winter, enduring storms of whose magnitude none can tell. The final act, just completed, was continued in the salvaging of the machines.

One of the monoplanes was the property of Dominion Explorers, Limited. A little over a week ago supplies of gasoline and oil were taken to the scene of the forced landing. The machine was "gassed up" and flown to Coppermine River, where, without incident it was placed in service.

On Thursday evening last, August 14, the machine was flown by one of Western Canada Airways, was reached by Pilot Buchanan and his mechanic, and on Monday evening, August 18, the machine landed at McMurray.

So far as can be seen, the machines suffered no damage, although their long stay in the Arctic. Their motors started without difficulty once they were back in the south.

The Western Canada Airways machine will undergo a thorough examination at McMurray to determine if a complete overhaul is necessary.

Settlement Of Disputes Under A World Court

Canadian Offer For Britain

British Market Offers Great Opportunity For Canada

Montreal.—Canadian beef will re-enter the British market for the first time since 1928 with the shipment from Montreal this week of 128 head of steers, from the St. Lawrence shippers, steers in Ontario and now consigned to a firm of importers in Manchester.

The majority of the steers were raised on the farms of P. J. Henry, of Riverton, Ont. and M. J. Campbell, of Dutton, Ont.

Shippers of livestock believe that the British market, dead for the past five years, for the future, such as condensed, once more offers remarkable opportunities for Canadian breeders, according to Donald Munroe, president of D. Munroe and Sons. One hundred and sixty thousand head of dressed beef were shipped from Canada to the United States last year, but for the future, such trade is severely hampered by the unfavorable American tariff.

Some of the trade could, he believes, be diverted to Great Britain. The only competition in the highest grade of beef in the British market comes from the Irish breeders, but it is only seasonal competition and could be met with ease by concentration on the part of Canadian breeders and exporters.

Control Of Immigration

Report Of Royal Saskatchewan Commission On Immigration Has Been Submitted

Saskatoon, Sask.—Main outline of the report of the Royal Saskatchewan Commission on Immigration and Settlement has already been submitted to Premier J. T. M. Anderson, of Saskatchewan, and the full report will be printed immediately on completion, Dr. W. W. Swanson, chairman, announced here.

Findings and recommendations of the commission are expected to be unanimous, the chairman indicated. The commissioners have reached unanimity on all major issues. In view of the urgency of the question, both in Ottawa and at Regina, and because of changes already made in immigration laws, everything possible will be done to have the report printed immediately so that it may be made available, through the courtesy of the provincial government for the information of members of parliament at Ottawa and Regina. The investigation has been a thorough one. Hearings have been conducted in all parts of the province. Since the commission was appointed last fall, all the major news items have been heard and personal investigations have been made by the commissioners.

Plan Relief Work

Toronto, Ont.—Announcement has been made by Mr. William Finlayson, Ontario Minister of Lands and Forests, the government is completing a scheme of relief work in Northern Ontario to take care of many of the unemployed lumbermen and mill workers who are faced with destitution during the coming winter.

Proposed Health Insurance

Compulsory Form Of State Health Insurance Mooted For R.C.

Victoria, B.C.—Legislation calling for a compulsory form of state health insurance will be placed before the R.C. legislature at its next session, according to reports current at the parliament buildings.

Although the royal commission on state health and maternity benefits has not yet completed its labors, which have taken its members to all parts of the province, it is expected that hearings will conclude and a final report will be ready before the session opens. The report will contain comprehensive recommendations to the legislature on which to frame legislation.

To Celebrate Victory

Six Premiers To Attend Conservative Dinner In Toronto

Toronto, Ont.—Six premiers are expected to attend a dinner here in connection with the annual meeting of the Ontario Conservative Association, November 20 and 21.

Hon. R. B. Bennett, Prime Minister of Canada, and Provincial Premiers of S. P. Thompson, British Columbia; J. T. M. Anderson, Saskatchewan; G. S. Harrington, Nova Scotia; J. B. M. Baxter, New Brunswick; and Howard Ferguson, Ontario, will be present at what is planned to be a celebration of the party's victory at the recent Dominion election.

Persons, a member of the Toronto Flying Club, and a pilot in the Great War, had flown an amphibian biplane to Waanga Beach recently. The machine was the only one of its kind in the Dominion, it is claimed. The engine and propeller are situated overhead.

After considerable tinkering, Parsons was able to start the engine, but in getting down he slipped and fell into the whirling blades of the propeller.

Montreal Bank Robbed

Montreal, Que.—A daring and spectacular hold-up was staged here when two armed bandits held up the four employees of the Banque Provinciale, at 4137 St. Catherine Street, East, and a customer, and escaped with \$2,970 of the bank's funds, by commandeering a passing taxicab.

After considerable tinkering, Parsons was able to start the engine, but in getting down he slipped and fell into the whirling blades of the propeller.

Prominent Marksman

Yacht Wrecked Off English Coast

Commander King and Five Others Lose Lives When Vessel Goes Ashore

Powey, Cornwall, Eng.—The 25-ton yacht "Islander" wrecked upon the jagged rocks of Lantivet Bay in a violent storm which pounded the English south coast, carried Commander Henry Douglas King, a prominent member of parliament, and five other men to death.

With the Commander King, who had chartered the "Islander," August 9, for a vacation cruise, were Commander Searle, of Liverpool-on-Tweed; Surgeon Captain A. H. Bralley, Dunmow, Essex; Captain Glasbrook, of Bishop, Stortford; Harry Lucas, captain of the yacht, and his 17-year-old brother, Walter.

The yacht, which was owned by Lieutenant-Colonel John N. Diggle, had been participating in regattas of the Royal Yacht Squadron along the English south coast. When the boat reached Lantivet Bay, it encountered the storm and piled up on the numerous rocks of the bay.

Great waves punished the craft as it perched on the jagged boulders and it soon went to pieces.

Half a Million For Roads

Quebec, Que.—The sum of \$500,000, in order-in-itself, the province of Quebec by the Quebec government at a cabinet meeting for the use of road construction and one-half of the regular highway budget of \$12,000,000 and will be used in road building throughout the province, where the unemployment situation is most serious.

Victory Over Reds

Hankow, China.—Chinese press dispatches said Kiangsi provincial troops scored a crushing victory over Communists in the western part of that province, killing 4,000 Reds and capturing 2,000 rifles.

Causes Of Earthquake

Little Known Forces May Be Factors In Earth Disturbances

The "trigger" force that sets off earthquakes, like Italy's disaster, is identified vaguely in scientific theories that place it at the outer fringes of the earth's own depths. This trigger, the final force that kicks the quake into action, is sought as one possible means of forecasting quakes.

Gravitational forces are agreed on as a basis of earthquake power. But the condition that upsets the balance of rocks, of mountains or whose sections of earth's crust so that they stand like a house of cards ready to be tumbled down by a comparatively slight push, has not been agreed upon.

Identifying the trigger is one beginning for penetrating further back into the mystery. One suspected trigger, is the microseisms, which have come to light recently with the advent of super-sensitive seismographs. Microseisms are tremors that have been traced to oceanic tides. Their cause is not known, but changing weight of the air that accompanies weather changes, is suspected.

Another unproven trigger, is the weight of the ocean tides, sweeping over the continental shelves, which are the comparatively shallow water surrounding continents, as far as 100 miles off shore. Another which might be either trigger or the builder of the stress, is the possibility of the tides in "solid" earth. H. P. Hutton, director of Perkins Observatory, at Delaware, Ohio, this spring, advanced arguments that these earth tides actually exist.

Chase R. Osborn, now candidate for the United States Senate, in Michigan, holds that the well-known wobble of the earth's poles, with the consequent tipping, and reshaping of the earth's shape, accounts for the unbalancing. The theory of tectonics is widely held. This means that the earth's crust, instead of being a uniformly solid cover, is made up of sections of all sorts and sizes and weights that must balance against each other, with all manner of "leakages". Asthenolites are another hypothesis. They are sections where molten rocks 30 to 40 miles below the surface, thrust upward, and in gases that cause both volcanoes and earthquakes.

The meeting of rocks is held to come from extra pressure of an unbalanced earth crust against them. An asthenolite might grow anywhere.

A Canadian Playground

Sylvan Region Of Great Beauty Is Found In Northern Saskatchewan

North of the great fertile belt devoted to agriculture there lies in the province of Saskatchewan, Canada, a region of rocks, woods, and water which seems almost to have been formed by nature at a special playground for man. Here are found thousands of crystal lakes. White birch, jack pine, and white spruce stand tall to unsundered heights. Beauty, pickered, pile, and gray trout are plentiful in the lakes and streams, while moose, deer, bear and many species of game birds abound. A typical example of this region is Prince Albert National Park, first set aside in 1925 and is an important addition to Canada's already fine system of national reservations.

Business Man's Tour To Orient

More than thirty reservations from all parts of Canada have been made with the Canadian Chamber of Commerce for the business men's tour to Orient. This first ship, leaving Vancouver on October 15th, H. H. McMillan, of Vancouver, chairman of the excursion, states that he expects an additional fifty reservations will be made before sailing day.

The high cost of living wouldn't be such a problem if the tourist didn't today had not become the necessities of today.

"You are a quarter of an hour late, Mr. J. I fell down the stairs . . ."
"But that does not last a quarter of an hour."—Hummer, Hamburg.

Mostly Kleptomaniacs

Found That Shoplifters Hardly Steal Because They Are In Need

Shoplifters do not steal because they are in need but because they cannot help it.

This statement was made by the head of the inshore detective squad of one of Toronto's largest department stores. The question was raised and answered as a sidelight in connection with the unusual number of shoplifting cases that have figured in the press during the past few weeks.

In the vast majority of cases that come up, The Mail and Empire's informant declared, it is found that the people who steal are in no way in need of the things they steal. They do it usually because of some idiosyncrasy of make-up.

In fact, so unusual is it to find people stealing because of necessity that recently, when a woman was brought in for stealing from the store in order to feed her family, the management, after she had confessed, cleared the matter up with the police and sent her a shipment of groceries.

For some reason never yet explained, women are more addicted to shoplifting than men. They figure, in fact, in almost 80 per cent. of all shoplifting cases.

It is the common opinion of the store authorities. Shoplifting is not confined to any one class of society. It is almost as common amongst the rich as the poor, amongst the upper levels of society as the lower.

"We've had some amazing cases to prove this point," the detective head declared. "We have one professor's case in our files in which the man stole repeatedly and is repeatedly caught. You'd be amazed if you knew who it was. We always go by the usual rule, and he makes things right the woman always treats the matter lightly and doesn't seem to be worried in the least when she gets caught."

The attitude of the store towards the caught thief is surprisingly mild. "We prosecute very few cases," the detective declared. "Usually only those who defy their guilt. In most cases, we just let them go. What the offenders look as if they were really bad characters, however, we lay charges against them."

Counterfeit Bank Notes

Equations Bank Of Nova Scotia Took Bill, Being Circulated

Counterfeit Bank of Nova Scotia notes have been circulating in Canada, according to a warning issued by the post office department. The spurious issue is described as follows:

"The counterfeit is a photographic copy of the front of the genuine note. It is a 100-cent note, with the letter 'A' in appearance. It is dark and is slightly blurred. The back is of the 1924 issue of a deeper blue and is a cut-blank. The design, which are crudely executed, are about the same height but wider, and the words '100 CENTS' are already present before take up slightly more space than on the genuine bill. In size, one of the fictitious notes presented about 10 per cent. larger than the genuine, while another is the correct size. The paper is rather gray and has a shiny finish."

Politics Are Precarious

Ten Years More Than The Average Length Of Tenure For Parliamentarians

Politics, apparently, is the most precarious and short-lived of all professions. Every two decades Parliament renews itself, and thus, incredible it may seem, there will not be a half-dozen men in the new Parliament who sat in the House with Laurier. Since 1911 more than 400 men have entered Parliament, strutting the stage for a brief time, and then passed to oblivion. Ten years is the average length of the tenure of two sessions of the House, is more than the average length of life for the ordinary parliamentarian. — Ottawa Journal.

Tourists Travel By Air

As the first of the flying touring parties planned in Europe, this, 20 planes with amateur pilots, recently started from England. The first stop was at Frankfurt, Germany, where they spent a day in sightseeing, and in attending a banquet at the local sports club. They next visited Friedrichshafen, and afterward stopped at many other European cities.

Western Canada Coal

With the exception of one antitracite, practically every kind of coal to be found in Alberta and British Columbia. The high grade lignite and sub-bituminous coals of Alberta are designated by the provincial authorities as domestic coal to differentiate them from the ordinary lignite.

Conserving Wild Life

American Game Protective Association Will Tag Deer To Study Habits

Science is advancing in various ways on the battle line to conserve and restore wild life. The latest information reported, is that of "tagging" deer, to try to learn more of their life history, ranging and feeding habits, and altogether, to determine their effect on the forest.

Reaching the American Game Protective Association, New York. Tagging of fish, ducks, upland game birds, and even song birds, has been in operation for some years and much valuable data compiled which is being used to help create ideal conditions for the various species.

For instance, the life history of different kinds of ducks is being learned rapidly, their flight lines established, their favorite foods determined, and other conditions necessary for their well-being ascertained. As a consequence, ideal refuges and sanctuaries are being established along the flight lines.

Now comes the deer, to be put under the microscope of exacting science. The conservation department of Michigan is tagging a number of wild fawns, as rapidly as they can be caught. The location of tagging is taken later, comparisons with the original data will be made.

Suppose the deer is taken three years later, several hundred miles away from where it was originally tagged.

"Why?" science immediately asks, and then proceeds to find the answer. And within this answer will lie valuable life history of the wild deer that can be made use of in creating better conditions in the wild for this species.

The Study Will Continue over a Course of Years, and It is Expected, Practically Every State that Has Wild Deer Will Make Similar Studies of Their Native Species.

Hoboes Flag Train

Foreigners Out Of Luck When Conductor Collects Fares

In these days of unemployment, it is nothing to see half a dozen hoboes men jump a freight car on the fly in order to make the next town and possibly a job, but the climax was reached on the Hudson River Railway a few days ago when two foreigners got the idea that the "people's road" was made solely for their benefit.

The mixed train was running south from Churchill when it was flagged by two men at a small station. When the train stopped the men jumped in between two box cars for the ride into The Pas. The conductor gave the new Canadians a lesson in Canadian procedure. He walked down the train, ordered the men out from between the cars and sent them back to the day car. When they were seated, he collected their fares and the train proceeded.

Sweets For Livestock

Molasses In Grain Mixtures Found To Be Unappetizing

Feeding experiments at the University of Minnesota's College of Agriculture, tend to show it doesn't pay to eat molasses with sweet tooth. Using molasses in grain mixtures fed to calves, it was found they appeared to relish the food, but it brought no greater gains in weight than regular diets — without the expense of sweetness.

Urban and suburban railroads of Berlin carried 145,600,000 passengers last year.

Linenen wears better if waxed occasionally.

CANADIAN NATIONAL APPOINTMENTS

R. J. S. WEATHERSTON
Appointed General Freight and Passenger Agent, Atlantic Region, with headquarters at Moncton, N.B. The position of General Passenger Agent is abolished.

Mapping the Seas

Work Proceeds In Matter Of Correct Charting Of The Oceans Of The World

A new director is being elected to the International Hydrographic Bureau, at Monaco. This institute was founded after the war to enable the sea-mappers of the world to work on similar lines; it is in fact responsible for the correct charting of the oceans of the world.

Now that experts, aided by accurate scientific instruments are able to map the seas with certainty, we must not forget the pioneer navigators of old who braved countless dangers on their voyages across unknown oceans.

Christopher Columbus is the most famous of these brave adventurers who made voyages of such momentous discovery and another great sailor-explorer was Vasco da Gama, who doubled the Cape of Good Hope.

Ferdinand Magellan, the Portuguese navigator, who first sailed into the Pacific Ocean through the straits of Magellan and the Spice Islands, though his achievements in daring and sea-exploration are of the greatest importance.

Disappointed with his treatment at the Portuguese Court, he took service with Spain, and after a voyage to Java, Macao and the Spice Islands, he decided to try to discover a western route to these islands.

Magellan sailed on and reached the Philippines, but in 1521 he was killed in an affair with natives. His fleet, however, continued their voyage, and after rounding the Cape of Good Hope, arrived at Seville, with the tremendous distinction of having sailed round the world.

Will Study Eclipse

Scientists Will Endeavor To Ascertain Effect Of Sun On Radio Reception

Important scientific results may follow the observations of the total eclipse of November, which will be visible at Nunavut, familiarly known as Tinian Island, New Zealand, this month.

With a view to making a complete observation of the eclipse, the New Zealanders have borrowed instruments from Europe. The line of work in connection with the eclipse, will be carried out by the New Zealand Radio Research Committee, which has arranged for observation on the transmission of radio signals across and along the path of the eclipse — observations which will throw light on some of the interesting problems of radio reception.

Definition Of A Gentleman

It Is Not a Matter Of Birth But Of What He Is

Here is the definition of a gentleman, by one of the leading gentlemen of his generation. You meet the greatest gentlemen when you least expect. A gentleman is a gentleman no matter what he is. It is not in the title of the name, but what is in his mind. So long as a man does what is right in any walk of life, sport or otherwise, then that man is a good man—and a gentleman. Lord Londale, the veteran sporting peer, gave the above definitions in responding to the toast of his health, at a luncheon given in his honor at Portmarnock, Glamorgan, recently.

A curved shelf of cardboard is used instead of a soundbox to reproduce the tones of a Swedish inventor's phonograph.

Homesteads Still Available

Millions Of Acres In Prairie Provinces Not Yet Disposed Of

Fear that the homestead policy under which certain public lands are now to be settled, will live upon and improve them might be discontinued is set at rest, temporarily at least. With the recent transfer of Canadian public lands in the provinces of Manitoba, Saskatchewan, Alberta and British Columbia to the administration of those provinces, the question arose whether the free homestead policy would be continued. It has been given that at least the greater part of the area affected, the free homestead policy will be continued for the time being, although the possibility of future changes exist. This possibility is said to have affected a speeding-up of homestead entries at the present time.

Since the purchase of the territorial rights of the Hudson Bay Company, in Western Canada, by the Canadian Government, in 1870, the practice of granting public lands to settlers who would develop them has been followed. Homestead entry No. 1 was made in 1872, just 58 years ago. Since that time, the number of acres exceeds 58,000,000 acres. A homestead consists of 160 acres, and may be made up of several parcels, who is the sole head of a family and any male who has attained the age of 18 years, and is a British subject, or declares his intention to become one. An entry fee of \$10 is charged and certain residence and improvement conditions must be complied with before title to the land is issued.

A recent compilation places the number of surveyed lands, now disposed of in Manitoba at 3,800,000 acres, Saskatchewan, 3,000,000, and Alberta, 14,872,000 acres. More homestead entries are made by Canadians than by any other nationality, followed next by Americans, and next by English.

Warning To Hunters

Carelessness Takes Annual Toll Of Many Lives

"Take the lunch out of hunting, and the guess out of gunning, by never shooting at movement or sound," Charles Avery, president of the American Game Protective Association, says in urging hunters to take care. Avery, who is also a game warden, says that conservation groups who have recently inaugurated campaigns to stop the needless killing and wounding of many persons every year.

"Wind-blown tree limbs or bushes and movements of fellow hunters, or live stock nearby, often cause optical illusions for the unwary," Mr. Avery says.

"With the 1930 hunting season for many game bird and animal species about to open, every hunter can do his part to stop the loss of human life."

The careful hunter always holds the muzzle of a loaded gun down or in such an upright position over his shoulder when walking, that his companion will be hit if he is startled or accidentally. Many old-timers always unload during rest periods and before they get into camp at night. "Never to identify a man, never can tell what might happen."

Luxuries For Eskimos

Hudson Bay Trading Schooner Carries Ice Cream Freezer To Furs

North
The Eskimos of Canada's far north have become ice cream conscious, and when the schooner "Old Maid No. 2," picturesque trading schooner of the Hudson Bay Company's fleet, left Vancouver for the Western Arctic recently, she carried what is believed to be the first ice cream freezer to pass through Behring Straits.

Wale blubber must have lost its place among the hardy Eskimo's diet, for cases of peanut butter, fruit salad, grape juice, candy and grapes, lozenges, jams and vegetables found a place in the assortment cargo. All sorts of candies were also included in the cargo, and according to the shipper, the sweet goods are for Christmas presents. The territory visited by the trading vessel is reached from the outside world but only a year.

Large shipments of fence wire, to be used for newly established fox farms, were also included in the cargo. There was even a parcel marked "big hat" which caused considerable speculation.

Princess Gives First Aid

Princess Giovanna, the King of Italy's 22-year-old daughter, was trained well by the Red Cross, as Mantion Moroni, an artilleryman, has testified. Thrown from his horse, he was lying bleeding in the snow when the princess came upon him in her motor car. She bound up his wounds and had her chauffeur take him to the speed limit in reaching a hospital.

The London Of Dickens

Little Tours Around Old Nooks and Corners Of City That Famos

Any ardent member of a Dickens Fellowship who comes to London makes an itinerary all his own. He may visit the old Victorian houses in Abbey, but he will be at least an eager to see "Little Dorrit's Church."

He may look forward to exploring the Tower of London, but he will be as anxious to wander in Temple Gardens where Ruth Pinch used to meet John Westlock. The late C. S. Wade, Agent-General for British Columbia, spent many a hour in taking Canadian members of the Dickens Fellowship round old nooks and corners of London rendered memorable by the great writer. Fred Wade was a Dickensian of independent ideas, and his conclusions on Dickens lore and topography did not always coincide with what may be called the authorized version. This is not saying, though, that Wade must necessarily have been

Wrong. He was not a veritable Dickens "fan" to appreciate the new edition of "The London of Dickens," which is described as being in existence for a tour which it would occupy two hours to walk. The author includes every street and every house mentioned in Dickens' work, and includes references to every house in London in which Dickens ever resided.

London has altered immeasurably, of course, since the days of Dickens, but even if some of the buildings which are described are no longer in existence their surroundings are nearly all entirely different. Take St. Martin's Church, Trafalgar Square, for instance, on the steps of which Dickens' Copperfield encountered Mr. Peggotty after a long search for Little Em'ly. As a matter of fact, Peggotty's time was never a Trafalgar Square nor a Nelson Monument. Just around the corner of the Square in the Strand one finds today the Golden Cross Hotel. "Ah, that's the place where the Pickwickians set out with their dogs," says the author, "and uncertain lover of Dickens. The Golden Cross of Pickwick Park, where also David Copperfield laid his hand when he first met Mr. Pecksniff, stood on the spot where the Nelson Monument now is."

Readers will recall no doubt an allusion by David Copperfield to his taking an early morning swim in a Roman bath, which existed just off the Strand. "It may be there yet," remarked David, parenthetically. Yes, and it still there, a century or more after Copperfield's time — and is still being used largely as Copperfield used it, and as it was used by young Frodo when the Crucifixion was a comparatively recent event.

Mr. Dexler's book serves not merely as an exhaustive de mæcum to Dickens' land in London; it makes a most attractive supplement to any more elaborate guidebook to London in general. Unlike some Dickensians, the author for the most part resists the temptation to identify any place which reasonable people conclude never existed except in the novelist's imagination. Mr. Dexler acknowledges his indebtedness to previous workers in the same field. They all must have walked and worked with amazing fervor, for not only have they exhausted the regular byways, but they seem to have sought out every little back-alley which could have existed in Dickens' day. It is easy to believe that the task to them was a fascinating one.

First Apples Exported

The first apples exported from Nova Scotia are said to have been shipped by sailing vessel from Halifax to Liverpool in 1846, the price realized being \$2 per barrel. In 1856, a shipment of 700 barrels was made by schooner to Boston, U.S.A., the price realized being \$2.75 per barrel.

A good English waiter is said to be the best servant in the world.

"Jack, can you swim?"
"What do you ask that?"
"Oh, nothing — but I just thought it is — Karlshafen, Oslo."

Plan For Wholesale Emigration From Britain As Solution Of The Unemployment Problem

Wholesale emigration under the direction of public utilities, which would be given special concessions for buying or leasing large tracts of vacant land which would be developed with the aid of the British and Dominion governments, is Labor's newest scheme for a solution of the unemployment problem which is costing Great Britain \$700 per minute.

Horse Greeley "no west, young man," would become "go east, or west" for the plan embraces all parts of the Empire. The idea will be brought up at the forthcoming Imperial Conference, in London, England, with the hope that the Dominions will approve the scheme and agree to a partnership with the Labor Government in finding a place for the more than 2,000,000 persons unable to find work in Britain.

Immigration questions in the Dominion are a new approach on the government feel that the old system of homebased and the movement of people were wholly ineffective under modern conditions and that the Dominions were also expected to pay huge sums they would only swell the ranks of the unemployed influx of British where they unemployed.

The scheme is therefore a pretentious plan to find a place for those at present unemployed and not wanted. The utilities would be given co-operation in acquiring land and the development of virgin territories would be left in their hands. The British and Dominion governments would aid in carrying out a comprehensive plan to settle the new territory and emigrants would be furnished as man power for the markets needed to establish a new economic frontier.

The government is pushing the project for a new type of pioneer and the unemployment problem of the even claim the idea is a solution of Dominions as well, since the opened territory will be open to the workers there as well as England. It also claims that thousands are willing to leave immediately, but the uncertainty of unemployment holds them in England for their debt.

It is understood that one Dominion has already endorsed the scheme. There is no anticipation of Britain or among the proponents trouble in finding investors in the event the plan is adopted.

To Relieve Unemployed

Nearly 12,000 Extra Men Engaged By C.P.R. On Improvements From Coast To Coast

Nearly 12,000 extra men are finding employment this summer in the Canadian Pacific Railway's programme of construction, maintenance and improvement, from coast to coast. Construction work of all kinds is being done both directly by the company and also by contractors, the company itself employing some 8,000 men in "extra gangs" throughout its system. The varied programme includes the laying of tracks, the repairing and renovation of right-of-way, bridges, tunnels, stations, and other buildings. The men, in general, are recruited as near as possible to the scene of work and kept steadily employed until each job is finished.

Increase Wheat Duty

An increase in duty on wheat imported into Italy put into effect recently in order to safeguard the farmers of the country from unprofitable prices has been reported by A. B. Muldman, Canadian trade commissioner in Milan, to the Department of Trade and Commerce. There is an official estimate of loss of about 1,000,000 tons of wheat in this year's harvest.

A motion picture screen which permits showing pictures outdoors and in lighted halls has been invented by two French engineers.

Saskatchewan Egg Pool

Higher Prices Obtained This Season Over That Of Last Year

An increase in prices over those paid for the same period of 1929 is noted in the final payment of the Saskatchewan Co-operative Poultry Producers Limited, or Egg Pool. It is claimed that these prices (extra 22 cents; firsts 19 cents; seconds 17 cents and extras 15 cents, net cash. Each shipping point on freight shipments), are not only higher than at the same time last year, but are from one to two cents per dozen higher than those paid by any other commercial dealers in the province. The volume of business handled by the Pool has again increased by 18 per cent, following last year's gain of 58 per cent over that of 1928.

Ayrshire Breeders' Association

Ninety-Five Reports Of Cows That Qualified For R.O.P. Standing During June And July

The Ayrshire Breeders' Association received 95 reports of cows and heifers that had qualified in the R.O.P. in the 262 day class, and 82 in the Honor Roll or 305 day division. In the former, 15 qualified in the mature class; 4 in the four-year-old; 9 in the three-year-old; and 9 in the two-year-old class. Twenty-seven of these records were made on two milkings a day.

(By Annabelle Worthington).

Unique wrapped skirt treatment distinguishes this model in navy blue crepe silk. The hips are snugly fitted. The waistline is belted at normal, which is generally becoming. The surplus body is rolled into revers that show smart facing in white crepe silk. It's an exclusive type of slenderizing line that is charmingly appropriate for all-day occasions. Style No. 2551 can be made in sizes 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44 and 46 inches bust.

It is lovely in black and white chiffon, printed voile with white trim. Blue chiffon with white trim, dotted crepe silk and aquamarine blue crepe. Pattern price 25 cents. Be sure to call in size of pattern. Address Pattern Department.

BEATS YOUNGER MEN

One of the outstanding features of the sea sea meet at Swastika Beach, Puelich Lake, recently, was the driving of A.M. William Marriot, of Hepler, Ont., who not only won the local race in three straight heats from younger men, but stepped on up into the open competition of Class "C" and finished first in a good field of high-class and experienced drivers. Up and around Puelich Lake A.M. Marriot is affectionately known as "OL BILL," for he drives a real racing sea outfit, and is not only a superb rough water driver, but he skims the buoys by a whisker and is not afraid to plow right into the turmoil of a big field. His work at the starts drew cheers every time he came up to the flag.

Canada Holding Trade Position

Domestic Maintains Place Among Leading Trading Countries Of The World

Ottawa, Ont.—Canada maintained her position among the leading trading countries of the world in the fiscal year ending March 31, 1930, despite a sharp decline in export trade and a slight falling off in import trade. This is disclosed in the condensed preliminary report on the trade of Canada, 1930, issued recently by the Dominion Bureau of Statistics.

The year was marked by an unfavorable balance of trade of \$100,335,912 compared with a favorable balance the year before of \$123,216,984. This was attributed to the falling off in the export of grain, particularly wheat, to the United Kingdom and continental Europe, due partly to lower yields.

Canada's trade in the last fiscal year was \$2,393,212,000 compared with the total of \$2,654,575,000 in 1929, and \$2,539,555,000 in 1928. It is thus seen that while trade last year showed a falling off in comparison with the year before, it was still in excess of the total in the year ending March 31, 1928.

Imports last year amounted to \$1,248,273,582, compared with \$1,205,679,091 the previous year. The sharp decline in exports is indicated by the total figure of \$1,144,938,076, compared with the 1929 figure of \$2,388,896,076. The decrease in exports was \$243,958,005, and the decrease in imports was \$174,605,583, 17.6 per cent for exports, and 1.4 per cent for imports.

In export trade Canada leads the world in the export of printing paper, nickel, and asbestos; occupies second place in exports of automobiles, wheat and wheat flour, and fourth place in exports of wood pulp as well as a very high place in the world's exports of such staple products as lumber, fish, copper, raw fur, whiskey, meats, rubber tires, farm implements and raw gold.

Interpreter Knows His Job

One of the busiest men in London this summer is W. Brotherton, interpreter for a bus company, who directs people in their own language. Besides English, his own tongue, he speaks German, French, Italian, Danish, Swedish and Japanese. "I can even talk American," he said, "which is just as well for any number of Americans seem to think they need an interpreter in London."

Asbestos in Manitoba

Valuable Mineral Located At Two Points In Northern Part Of Province

The reported discovery of asbestos at two points in Northern, Manitoba may broaden the range of Manitoba's mineral wealth, but cannot affect the national leadership in asbestos production, which is already securely held by Canada. Canada produces about 74 per cent of the world's supply of asbestos, Rhodessa about nine per cent, Russia about six per cent, and South African about six per cent, the remaining production being distributed in small quantities among other countries.

Asbestos, although a mineral, consists of silk-like threads which can be spun and woven much as a textile. On account of its fire-proof quality it is used extensively in building and in manufacturing. Canadian shipments, in 1929, amounted to 308,000 tons, valued at \$13,172,581, an increase of 12.1 per cent in quantity, and 17.2 per cent in value over the previous year.

Largely Self-Supporting

Many Canadian Industries Capable Of Supplying Home Market

According to figures issued by the Dominion Bureau of Statistics, the Canadian dairy industry provided over 98 per cent of the 31,481,765 lbs. of butter consumed in Canada in 1929, and two-thirds of the 299,348,371 pounds of butter consumed. Super consumption in 1929, amounted to 944,963,712 pounds, of which 98 per cent was refined Canadian refrigerated. Salt consumption amounted 467,371 tons, of which two-thirds was Canadian-manufactured. Slightly over 50 per cent of the 14,077,077 tons of coal made available to the Canadian public in the first six months, in 1930, was mined in Canada. The value of radios and radio parts made available to the Canadian public, in 1929, amounted to \$3,170,293, of which nearly 70 per cent was manufactured in Canada.

Put On Publicity Program

In a further effort to bring before the people of the province the great variety of the produce of farm and factory, the Made-in-Manitoba Committee of the Industrial Development Bureau, is staging an extensive publicity programme.

Sidewalk cafes have been introduced in Havana.

PRICE OPENS NEW WORKSHOP

Valuable Resources Going To Waste As Vast Quantities Of Natural Gas Are Burned In Air

Free Correspondence Courses

Educational Opportunity For Every Boy and Girl In Saskatchewan

Educational opportunity for every boy and girl in Saskatchewan is the ideal towards which the attainment of which the provincial Department of Education is steadily working. Notwithstanding the rapidly growing system of secondary education in high schools, collegiate institutes and in elementary schools, these schools do not meet the situation fully. To supplement the work thus being done, provisions have been made by means of correspondence classes, to give a course of instruction to several hundred boys and girls who, for various reasons, have been unable to attend the benefit of pupils who have high school facilities, or who have such physical disability as would prevent their walking to school.

Farm Boys and Girls

Canadian Juvenile Club Work To Outstanding Among The Nations Of World

"Canada stands second only to the United States in all the world, in the work she is doing for her farm boys and girls. Our juvenile club work is outstanding among the nations," declares F. W. Walsh, superintendent of agriculture for the Canadian National Railways, who has just returned from England, where he attended, as one of the Canadian delegates, and made a special trip to the continent to study phases of agricultural development there.

Summerfall Trends

Found To Be No Advantage In Plowing Deeper Than Four Inches

How deep should summerfallow be plowed? The answer to this important question in respect to prairie farming is being reviewed by the Dominion Experimental Station, at Scott, Sask., where, after fourteen years of careful investigation, it has been found that there is no advantage in plowing summerfallow deeper than four inches, where a good job can be done at this depth. Not only is this so, but the cost for the proper retention of moisture, but a considerable saving in time and labor is possible, and it is the work of cultivation for weed control. Plowing at depths ranging from three to eight inches has been studied throughout the period of the test.

Poultry For Profit

Importance of Carefully Culling Flocks Before the Laying Season

The ten-year average of the cost of feeding laying hens at the Lennoxville Experimental Station, of the Dominion Department of Agriculture, is \$2.43 per hen. This means that with eggs selling at an average of 35 cents per dozen, it takes 0.75 dozen, or 94 eggs, to pay for the keep of the laying hen—only the eggs laid in excess of that number can count as a profit. This demonstrates the importance of carefully culling poultry flocks before the laying season begins. It is the hens that lay from 150 to 200 eggs a year that pay.

Good Road Making Material

Meet With Success In Extraction Of Tar From Sands In Northern Alberta

Success in the extraction of tar from bituminous sands in the McMurray area of Northern Alberta is said to have crowned ten years of effort on the part of K. A. Clark, of the Department of Alberta. It is reported that 95 per cent pure tar was taken from the sands in recent experiments and it is believed that thousands of dollars may be saved in road-building and other developments as a result of the availability of this material.

First Fleecener — "Isn't this an ideal spot for a picnic dinner?" Second Ditto — "It must be fifty million insects can't be wrong."

All airports in the United Kingdom now are government controlled.

Suppose by some accident, all the coal mines of Alberta should suddenly be set on fire, and before the fires were extinguished, a full year's output of Alberta coal should be destroyed. And suppose, while the fires were going on, that the government took no steps to prevent this gigantic loss. What an outcry would echo from coast to coast in Canada against such a national scandal. Yet, in another form, that is exactly what is taking place day by day.

Natural gas, more efficient for heating than coal, is being burned in the air in Turner Valley annually at a rate nearly equal to the entire Alberta production of coal in 1927.

In 1927, Alberta produced a total of 6,034,164 tons of coal. In 1929, Alberta burned in the Turner Valley, 109,520 millions of cubic feet of natural gas, equivalent in heating value to 6,570,000 tons of coal.

In 1929, Alberta coal production increased to 7,335,489 tons of coal. But, at the rate new wells are being drilled in Turner Valley, the natural gas which could be burned as waste is estimated to be 10,000,000 tons in the coming year, will exceed Alberta's banner year of coal production. These are not fanciful calculations. They are careful estimates, made conservatively, by gas and heating engineers. Enough natural gas went to waste in Turner Valley between August 1, 1929, and August 1, 1930, to supply the needs of present Alberta farms for 13 years. Assuming that Saskatchewan were to use eight billion cubic feet per year, and that the coal consumption was a half billion, enough gas went to waste in that time to supply Saskatchewan for 12 years.

Compared with coal, enough gas goes to waste in Turner Valley every day to equal nine train loads of high grade coal, each train being of 50 cars, and each car containing 40 tons. Thus, fuel equal to 18,000 tons of coal goes to waste. Multiply that by 365, and the waste is 6,570,000 tons of coal. The figure looks like light years in connection with a star on the outer rim of the universe, 6,570,000 tons a year to be exact. The daily waste, on an average from August, 1927, until the present, 1930, amounted to 600,000 cubic feet. Against this average of only 20,000,000 cubic feet per year.

If these train loads of heat had to be shipped out of Alberta just as the waste is shipped by the railways, there would have to supply facilities for two-thirds more trains than in the biggest rush season of the year. Ordinarily about 600 cars of grain are inspected at Calgary daily following the harvest. At that rate, on the same basis, these cars would constitute 12 trains. Therefore it would work out to nine heat trains and 12 wheat trains per day.

But that is only part of it. The wastage between August 1, 1928, and August 1, 1929, on the same basis, would have worked out to six train loads of heat per day, as, in a like ratio, the wastage for that year was 600,000 cubic feet. The wastage figured out for the season 1929-30.

These figures have all been for the past. The future can hardly be guessed. At present 50 wells are producing, and it is possible that 250 similar wells could be brought in without difficulty. Then the figures would be just multiplied by five. And Turner Valley is only one valley. There are others with possibilities according to geologists and experts in the oil game.

Canada Grows Fine Tobacco

Canadian Grown Tobacco Of Better Quality Than The Imported Leaf

Canadian farmers, consequent upon research work done by the Dominion Department of Agriculture, are now producing practically all the fine tobacco required by Canadian manufacturers, observes Dr. E. B. Archibald, Director of Dominion Experimental Farms, who adds that the quality is better than that of the imported leaf.

"Do you know what to look out for when fishing, sonny?" "Of course I do, the policeman."

—Hummel, Hamburg.

HER FAT IS MELTING
FAST AWAY

All over the world *Krukenfeld's* is appealing to girls and women who want to be attractive, to get a figure that cannot fail to win admiration.

Here's the recipe that banishes fat from the body, and makes it so attractive that every woman who uses it is a success.

Every morning take one-half teaspoon of *Krukenfeld's* in a glass of hot water before breakfast.

Be sure and do this every morning for at least a month. You will see the "fat" melt away.

Krukenfeld's daily makes every particle of poisonous waste matter and harmful acids and gases are expelled from the system.

At the same time the stomach, liver, kidneys and bowels are toned up and the pure, fresh blood containing Nature's life-giving acids is carried to every organ, gland, nerve and fibre of the body, and this is followed by that *Krukenfeld's* feeling of energetic health and activity that is reflected in bright eyes, clear skin, cheerful vivacity and charming figure.

CHAPTER XXVI.—Continued.

"I don't want anything but a cup of tea, dearie, and maybe a slice of toast. I remember Edward Howe saying that old folks don't need much to come night. And—see here, chiddy—the doctor told me about your plans and everything. I guess he thought I was saving you the trouble and you don't to worry about me. I've always thought it would be kind of fun to have you in a small house, and it'll be a sight easier for you. I'll be careful for me, too, not to go over the stairs come night. Besides, I don't like to see a half black farther down the street from that window! And it's going to be wonderful having you home day after day. I'll give you a little about how I'll take it, Charman. Between you and me, dearie, I think it's going to be fun."

Only after the girl had turned away, unseeing, and unable to see this display of bravery, did the old lady tremble.

"Thank God that's over," murmured Grandma brightly, while two big tears crept slowly down over her wrinkled cheeks.

CHAPTER XXVII

There were times during the days that followed when Charman found it difficult to believe that she and Grandma would ever be so close as the sister of the homestead. They seldom talked about it, but when the evening changes came and it'll be the old lady spoke cheerfully, stoically refusing admittance to the tears that lay so near the surface, when she would draw her up to her face show any of the dimmy that filled her tired old heart. These were hard days for Granddaddy's heart.

"Seems somehow as if he's grown smaller—shrunk, you might say," murmured Lizzie Barker to Salina Knowles. "It ain't easy to make changes at Grandma's age, but she's kept up before Charman's more'n good for her. And I'm sorry for Charman, too. I ain't ever seen a young person get set such store on anything old as she does on that house. I declare, Salina, there's times when I wish whoever's buying it would back out of his bargain."

But Miss Lizzie was not to be her wish. It was the last day of August when George K. called Charman to see him. He had a letter from the little room on his desk that had a formidable "Private" on its door, but which was really no more than a note that the air we breathe, because only on rare occasions did the president of the *Wickfield* National close his door. He closed it now, however, and took it. "What you been up to this afternoon?"

Charman smiled as she responded. "Why all this privacy? I've been to the library, as you might deduce from this armful of books. But I got more than the books. Uncle George. I got a job! Miss Garfield has asked me to help at the library two hours every afternoon. Isn't that wonderful? I can easily leave Grandma that long, or get Miss Lizzie to come in and sit with her, and it will bring in a little money. It was Grandma's idea. I'm going to stop at his office now and thank him."

"Well, that's good," George K. spoke cheerfully. "I'll do you good to get away each day, and see folks. What I called you in for, Charman, was to say that you can sign the deed at ten o'clock tomorrow. I just got word that your man will be here then, and wants to see you. I told him to come to the bank—thought maybe it would be hard for Grandma to see the act done, as you might say. I'm thankful now, child, that she decided the place to you. It would be hard for her to sign the house away. There, Charman, if you feel like crying, cry on my shoulder; but I advise you to buck up. In the long run most things come out right in this old world. I don't believe that sometimes I shouldn't be as happy as I am, or as fat, either!"

Charman turned to the rest of us, added Charman. "It's all right, Uncle George. I've been crying long, and have since acquired such a little money. It was Grandma's idea. I shouldn't be as happy as I am, or as fat, either!"

Charman turned to the rest of us, added Charman. "It's all right, Uncle George. I've been crying long, and have since acquired such a little money. It was Grandma's idea. I shouldn't be as happy as I am, or as fat, either!"

LUMBAGO?

A pain in the lower part of your back can torture you. But not for long, if you know about Aspirin! These harmless, pleasant tablets take away the misery of lumbago, rheumatism, neuralgia, headaches, toothaches, and systemic pains of women. Relief comes promptly, is complete. Genuine Aspirin cannot deceive the heart. Look for the Bayer cross.

like my mother before she fell in love with a fruit ranch."

Charman laughed, spontaneously, and Grandma asked: "You mean you're playing second fiddle these days?"

"Something mighty near it," grinned Jim. "Will you believe it, Grandma? I don't desire it, I left her sampling a new variety of citron. Gee! but it's good to be home!"

"Then you haven't fallen in love with—?" began Charman, when Grandma interrupted in horrified reproach.

"What do you mean, child, asking such a question?"

"I was just going to say in love with California," explained the girl, and Jimmy roared.

"No," he replied, after his mirth had somewhat subsided, "I didn't lose my heart to California. It has its good points, of course. Mother and Aunt Sophie are nuts over it—boast, I call 'em; but as for me—I wouldn't swap one of Wickfield's smiling, smiling acres for any of the whole darn state of California, and there's the truth!"

"That's!" ejaculated Grandma with satisfaction. "I always said that there's not a prettier spot on earth than Wickfield. Here comes the doctor. He seems to be in a hurry. Maybe—"

But with haste that seemed to both Grandma and the young man rather uncalled for, Charman sprang up, and was at the door when Jim reached the steps. She did not know, but those loyal hearts in the room beyond were to be wrenched most to the breaking point. She did not realize that the front door was reflected in the long mirror that hung beside it, nor would it have troubled her if she had known. All says ever or thought of was the light in John Carter's eyes as he thrust a scrap of yellow paper into her hands. She read the message and looked up, her lovely face reflecting the happiness that shone from his; and the next moment he caught her in his arms, and kissed her, rapturously, ecstatically.

(To Be Continued.)

For all Skin Abrasions — Mimir's Lintment.

Misfortunes may be turned into blessings by an indomitable will.

Many a saint after death develops virtues he had not exhibited in life.

"I hope they'll give it the coat of gold leaf it deserves," she said, and went inside, laid her books on the table by the door, and then stood still, staring into the room that had been a shop for almost as long as she remembered.

"I thought it was a word of greeting for the returned prodigal!" was asked Jim Bennett.

He arose from where he was sitting beside Grandma, and caught Charman's hands in both of his.

"Steady!" he said. "Folks have been known to expire of shock. I've warned you of my arrival but I started at a moment's notice, and ain't sit down, and he developed it."

He pushed her gently into the rocking chair, and drew up a straight-backed stool convenient for himself. In a sort of daze Charman heard her grandmother say anxiously: "Haven't you better get her a drink of water?"

"I'm not faint," she protested, "merely struck dumb, as you might say. Jimmy, you look—well—"

"Different, doesn't he?" put in Grandma; and Charman, noticing her for the first time since this amazing happening, saw that her sweet old face looked happier than it had for days. "He's got a sort of air about him," she was saying, "as if it right off when he came in. He looks—stylish."

"Gosh!" breathed Jim. "You talk

Advertising England

No Country in the World That Offers Greater Attractions

Britain, as Kipling said of Lord Roberts, "doesn't advertise." Sir James Parr, high commissioner for New Zealand, has been telling advertising men, in London, that "Englandmen are too reticent."

Why, he asks, should it be "bad form" to talk about themselves and their country, especially when, as he says, it is no other than compare with it in point of "human interest."

"What country has such wealth of historic places, such cathedrals, such homes both great and small?" he wants to know. And as for England's countryside in springtime, he says, "there's nothing on earth to equal its beauty."

Yet somehow England and its chief town, in spite of a lack of capacity for advertising, seem to be fair; well-known abroad. Consider London just recently.

It was passed to distinguished visitors. They ranged from the King of Spain, Prince Damrond, of Spain, and Prince Louis, of Montenegro, the newspaper editors of the Empire, the latest tennis celebrity and the latest contestant for the Henley regatta.

They come from all parts of the globe. The secret of it, of course, is that London, as you find such a round of entertainment, enjoyment and amusement packed into a few short months. You live in Britain during the "season."

You can have everything from grand balls to garden parties. The Royal Academy to a military tattoo, from a court levee or drawing-room to a golf championship, from a regatta to a flower show. There are hardly a day when some function or cultural event does not help to fill the social substructure.

Naturally, it costs a great deal to share in these delights. You can get a room for \$100 a night at a luxury hotel in London. And if you take a fashionable flat to be in the centre of things you can hand out \$100 a month for your landlord who will think he is obtaining only his just dues.

Should you be in the millionaire class, you can live even more expensively. You can take a furnished house in the West End. It will be the last word in style and comfort—almost to walk into. A thousand dollars a week is not considered as a high price for such a temporary shelter.

Checked For Air. Some little irritant becomes lodged in the bronchial tubes, often with the result of the choking of asthma results. Nothing offers more relief and positive relief than Dr. J. D. Kellogg's Asthma Remedy. The remedy, nothing answers it. It clears the air passages and gives instant relief. It has stood it years of success. It is the sure remedy for every sufferer.

Active At Old Age

Budget Chamber is Still Persuading Occupation At Age Of Sixty.

When should a man retire from active life, and how should he do it? A Budget chamber thought that about 60 was a good age at which to stop work, but determined to do it "with a flourish." He drove his cab all over the continent, and gave a good deal of attention by calling it not altogether correctly—the last horse cab in Europe. Then, in 1912, he presented the cab to the Budget Museum. He wasn't allowed to retire. The municipal authorities were so impressed by his adventurous spirit that they presented him with a tax-cab. And now, at 60, he is over 80, he is today in Europe once more—this time in the taxi. Old men are certainly more entertaining. "Greybeards" used to be the Eastern Europe seems to specialize in these adventurous oldsters.

On a London ride range a woman, who had never handled a rifle before, hit the bull-eye with fourteen of her fifteen shots. It is not known what she was aiming at.

Oriental Poppy

New Bloom Is Developed By Resident Of Duncan, B.C.

An Oriental poppy, developed from a seedling by E. W. Nicol, of Duncan, B.C., has been given an award of merit by the Royal Horticultural Society, and assigned the name of "Corichan" after the district in which it originated. The large blooms grow to 11 inches across on stems over 4 feet 6 inches. The color of the flower is dark red. The seedling appeared voluntarily in Mr. Nicol's garden, and he developed it.

U.S. Court Of Living

The United States Department of Labor, through the bureau of labor statistics, has issued a report on changes in the cost of living in the United States in recent years, which shows a decrease of 2.1 per cent. between June, 1920, and June, 1929. The information given is based on actual prices obtained from merchants and dealers in 32 representative cities.

Radio no far appears to be a failure in India. Atmospheric conditions lack of interest of a large portion of the people are two reasons, but the principal one is said to be the tax on receiving sets.

New South Wales, Australia, has banned all cold gasoline pumps.

Mimir's Lintment For Lumbago and Neuralgia.

WHOLE FAMILY
HAD DYSENTERY

Dysentery is one of the worst forms of bowel complaint and seldom attacks at once as its termination often proves fatal.

Mrs. H. P. Stewart, Padislar, Saskatchewan, writes: "Two years ago my whole family was stricken with dysentery. My husband got a bottle of Dr. Williams' Extract of Wild Strawberry and after taking three or four doses was completely relieved. Since then we have never been without a bottle of it in the house."

On the market for the last 85 years; put up only by The T. Millers Co., Ltd., Toronto, Ont.

Explore Arctic With Submarine

Sir Hubert Wilkins To Cross Polar Regions By Undersea Passage

Probably the most classic example of the economic law that scarcity creates value is on exhibition in Boston. Mass.—a one cent stamp worth \$40,000.

It is the property of Arthur Hind, Utica, N.Y., manufacturer, hotel owner and philanthropist, whose \$500,000 collection of stamps constitutes, financially speaking, just about as much of a hoard as the collection of 1930, which was opened at Horticultural Hall, in Boston, Mass.

The history of the stamp goes back to 1660, and British Columbia. The postmaster of that then isolated colony had found his supply of stamps exhausted. He had no printer, so a printer was called into conference, and with the aid of a picture of a one-cent stamp from Philadelphia, the stamp was turned out.

A few days later the regular supply arrived and the makeshifts were destroyed. Sixty years later, the only known copy came into the possession of a collector in Philadelphia, and day collectors say it is worth at least \$40,000.

The submarine will attain the speed of between three and four knots, when accompanied by the explorer to leave New York next May in the submarine and proceed to Spitzbergen. From that port he will begin his undersea studies of currents, etc., and will pass under the North Pole emerging in the ice floes of the Behring Sea.

During the passage beneath the surface of the northern waters, Sir Hubert plans to broadcast daily with a special radio set. The submarine is 175 feet in length. Among those who will accompany the explorer on his Polar voyage will be Dr. H. V. Sverdrup, who accompanied 1912 showing an explorational expedition, and Dr. Beining Melville.

Choked For Air. Some little irritant becomes lodged in the bronchial tubes, often with the result of the choking of asthma results. Nothing offers more relief and positive relief than Dr. J. D. Kellogg's Asthma Remedy. The remedy, nothing answers it. It clears the air passages and gives instant relief. It has stood it years of success. It is the sure remedy for every sufferer.

Hittite Castle Door

The Chicago Oriental Institute Makes Interesting Discovery

The Chicago Oriental Institute expedition, excavating at Alshar, has discovered a large Hittite castle door ornamented with bas-reliefs representing deer. The door has been transferred to the Chicago Museum.

Road builders in Scotland recently uncovered a chiefted stone, which aroused the curiosity of a highway engineer. He continued the digging and found Byzantine bases and pieces of money, apparently deliberately buried beneath the stone, which may mark a treasure trove.

Peruvian Rain — the one lot requisite for the dairy woman. Delightful to use. Leaves no stickiness. Softly absorbed by the tissues. Delicately fragrant. Imparts a velvety loveliness to the complexion. Tones up the skin. Soothes and banishes all unpleasant roughness or chafing caused by wind and other weather conditions. Makes hands soft and white. Creates an elusive, essentially feminine charm. Peruvian Rain is indispensable to women of refinement.

Historical note: When Lincoln was elected to Congress from Illinois his times to have a seamless-tube mill costing \$2,000,000.

On a London ride range a woman, who had never handled a rifle before, hit the bull-eye with fourteen of her fifteen shots. It is not known what she was aiming at.

Radio no far appears to be a failure in India. Atmospheric conditions lack of interest of a large portion of the people are two reasons, but the principal one is said to be the tax on receiving sets.

New South Wales, Australia, has banned all cold gasoline pumps.

Mimir's Lintment For Lumbago and Neuralgia.

Excuses are the common cause of indigestion. It results in pain and sourness about two hours after eating. The cure is simple. It is an alkali which neutralizes acid. The best cure is Mimir's Milk of Magnesia. It is a standard with physicians in the 50 years since its introduction.

One spoonful of Phillips' Milk of Magnesia neutralizes instantly many times its volume in acid. It is harmless and tasteless and its action is quick. You will never rely on crude cathartics. You never continue to suffer when you learn how quickly, how pleasantly Mimir's Milk of Magnesia can be taken. Please let it show you—now.

The Oyen News

CHAMPION MERMAIDS IN ROCKIES

Champion lady swimmers and divers of the United States invaded Banff and Lake Louise this month and gave thrilling exhibitions in the pools attached to the Canadian Pacific hotels at both resorts. Hundreds of guests at both hotels witnessed the show where skill and sources of superb natural beauty make a remarkable combination. Illustration shows the team with a background of Lake Louise and mountains.

About Town and Country

Oyen board of trade meets Thursday evening in the Alberta Hotel dining room at 8.30 p.m.

Millinery Opening—I will display my fall and winter millinery in Erskine's early in September. Watch for opening date. Mrs. R. E. Gillespie.

Mrs. W. F. Pratt has received word that her brother-in-law, Rev. Capt. A. M. McColl, former S.C.R. chaplain for Alberta, has accepted a call to the First United Presbyterian Church of Lincoln, Neb., U.S.A. Miss McColl will attend the state university at Lincoln.

Mrs. J. Kennedy and children who have been spending a vacation at the coast, returned to Oyen yesterday.

Mrs. J. S. Quinn left for Calgary where she will make her home with her husband, who has recently been appointed Divisional Superintendent of the Alberta Wheat Pool.

Mr. Thomas Lees and Mr. James Lees were business visitors in Calgary over the weekend.

Interest next month will be centred on Sir Thomas Lipton and his challenger Shamrock V. The popular sportsman received a great ovation on his recent arrival in New York.

Mr. and Mrs. E. P. Barbour, formerly of Oyen, who have been visiting in town during the last four days, expect to return to their home in Saskatoon tomorrow.

Mr. Henry Brace, deputy superintendent of insurance, was an Oyen visitor last week.

Commenting on the Pool and "Bootlegging" of wheat, the Ottawa Citizen says in part:

"The great bulk of members of the pool feel proud of the success of their organization in years past and know that they themselves have benefited by it. But, as every knows, recent conditions have borne heavily against the pool's defences. Now, more than ever, is the time for loyalty on the part of all the members."

Born—To Mr. and Mrs. J. Lees of Oyen, on Saturday, August 23, at Vancouver, B.C., a son.

Oven twenty-five members of Oyen ladies aid were guests at the home of Mrs. William Denton of Benton last Thursday at a delightful afternoon tea and garden party.

Father Lynett, who has been spending a vacation at Banff and other mountain resorts, returned to Oyen last Monday evening.

Mr. and Mrs. Jack Sweeney of Newton, Alta., who were visitors at the home of Mr. Charles Sweeney last week, left for their home last Saturday.

Mrs. T. M. Nunn and son Stanley, who have been spending a vacation at the coast, returned to Oyen yesterday.

Mr. and Mrs. J. J. Purcell and family moved into the J. S. Quinn home on First avenue east, yesterday.

Mr. and Mrs. G. P. Freebury and family arrived in Oyen yesterday from New Bridge, and will reside on Third avenue.

Mrs. M. G. Whitlock, and family, left last Thursday for Dismore and Lumsden, Sask., where they will visit relatives and friends.

Miss Laura Gearing, who has been the guest of her sister Mrs. G. A. Morrison, left for her home in Toronto, last week.

Len Chaney, noted screen character actor, who died in Los Angeles, Calif., Tuesday, August 26, will be buried at Glendale tomorrow.

Miss Catherine Wright commenced her duties as teacher at Abbott school last week.

Mr. Roy Sanders employed in the C.N.R. yards at Hanna sustained a broken rib and painful body bruises last week when he was thrown from a flat car on which he was riding. Mr. Sanders was a former resident of Oyen.

Miss Lena Hannawich had the misfortune to fracture one of the small bones in her ankle while playing tennis last Monday evening.

A classified adv. in the News will bring results.

King George's Code

1. Teach me to be obedient to the rules of the game.
2. Teach me to distinguish between sentiment and sentimentality, admiring the one and despising the other.
3. Teach me neither to prefer nor to receive cheap praise.
4. If I am called upon to suffer, let me be like a well-bred beast that goes away to suffer in silence.
5. Teach me to win, if I may; if I may not, teach me to be a good loser.
6. Teach me neither to cry for the moon nor to cry over split milk.

These six sensible rules of living crystallise the best teachings of the wise of all ages. They are not easy to live up to, although simple in their essence. They are rules for the young as well as for the adult, and one feels that as an ideal for children going to school they cannot be suppressed.

Let every student copy these rules and do his best to live up to his Sovereign's code.

IN LIGHTER VEIN

Prisoner charged with battery—My name is Sparks. I am an electrician.

Judge—(recovering from shock) Officer, place this man in a dry cell.

The revivalist announced that he would talk the following evening on the subject of "Lars" and asked those present to read the seventeenth chapter of Mark.

Next evening there was a large audience. When the time came for his address, he said, "Last night, I advised those present, that I would tonight speak on the subject of 'Lars'. How many of you have read the seventeenth chapter of Mark?

More than 200 raised their hands.

"Those who raised their hands will please pay particular attention: There is no seventeenth chapter of Mark."

TENDERS FOR SCHOOL HOUSE

Sealed Tenders will be received by the Board of Trustees of Hintonburg School District No. 204, at the office of the Secretary-Treasurer up to noon September 2, 1930, for the erection of a One roomed School building after Plan Number 63-C-343. Plans and specifications may be obtained from Secretary-Treasurer on payment of a deposit of \$5.00. Plans must be returned within 24 hours, and deposit will then be refunded. A marked cheque for five per cent of the amount of tender must be enclosed with each tender as a guarantee that same is bona fide. The lowest or any tender will not necessarily be accepted.

Edward Hey,
Secretary-Treasurer,
Hintonburg,
Nearest Station, Nilsdale, 5 miles distant.
